Plane of Chaos

Twisted and unpredictable; whereas Gods represent ideals and concepts, residents of the Plane of Chaos seem to embody an absence of mortal's touch. Mindless horrors roam this hellish landscape, and Demons scheme and plot to claw their way into bringing influence into the Material Plane. Rarely, cracks in the border between planes open up, and all manners of spawn could wander through. The portals that spawn in the aftermath often don't last very long, but still present a great danger.

Celestial Plane

Where Gods are born, and for many, where they reside. Seldom is known of the Celestial Realm, and Gods seldom speak much of it.

The Conflux of Elements

Warped and unusual, the Conflux is a larger realm that encompasses the Elemental Planes. The balance of elements depends on the tide of this plane; it is necessary for the ceaseless clashing and unusual harmonies in this plane to happen, to ensure stability in the Material Plane.
