

Solar Duality

A strange fact of life in Simuhay is recurring duality or pairs in all manners relating to the sun. The Heart of the Sun uniquely has a sentient presence within in addition to its magical power; it also provides two distinct evolutions to Compasses such as Vee, and Espeon, the more traditionally sun-associated of the two, has its tail split in two. In addition, the Guild Council's recent experiences in Helios have suggested a connection between the Sun Spirit and Tirial - whose defining ideal has been split into two distinct entities.
